PROFESSIONAL SUMMARY

Full-stack Developer focused on scalable solutions using the JavaScript/TypeScript ecosystem. Practical experience in the software development life cycle, from relational database modeling and building RESTful APIs to implementing dynamic interfaces with React and Next.js. Proficient in client-server architecture, CI/CD practices, and containerization with Docker. Committed to code quality, security best practices (JWT authentication), and test-driven development.

TECHNICAL SKILLS

- **Back-end:** Node.js, Go, Python (Flask), FastAPI.
- **Front-end:** React, Next.js, TypeScript, JavaScript (ES6+), HTML/CSS.
- **Databases:** SQL (PostgreSQL, SQL Server), Relational Modeling, Complex Queries, and Joins.
- **Tools & DevOps:** Docker, Git, CI/CD, Linux, JWT (Authentication/Authorization).
- **Quality Assurance:** Automated Testing (Jest/Vitest).

RELEVANT PROJECTS

Aether ERP | Full-stack Developer

Development of an Enterprise Resource Planning (ERP) system focused on high performance and scalability.

- **Backend & Integration:** Implemented RESTful APIs utilizing Clean Architecture and design patterns.
- **Data Management:** Relational database modeling (PostgreSQL), execution of complex queries for reports, and ensuring transactional integrity.
- **Security:** Implemented authentication flows and access control based on JWT.
- **Infrastructure:** Utilized Docker to standardize development and production environments.

Diabetes Care (Bachelor's Thesis) | Full-stack Developer

Health system with an "Offline-First" architecture for data synchronization between mobile devices and the cloud.

- **Development:** Built an API with Python (Flask) and a responsive interface using React Native/TypeScript.
- **Resilience:** Implemented resilient synchronization logic, ensuring local data persistence

and integrity post-reconnection.

- **Quality:** Applied unit tests to ensure the reliability of business rules.

NetPulse (CLI Tool) | Backend Developer

Command-line interface tool for network monitoring and system diagnostics.

- **Performance:** Development focused on low resource consumption and high concurrency using Goroutines.
- **Low-Level Interaction:** Optimized network routines and real-time diagnostic analysis.

EDUCATION

Bachelor of Science in Information Systems | Centro Universitário Atenas | 2022 - 2025

LANGUAGES

- **Portuguese:** Native
- **English:** Intermediate (Technical reading and writing)
